ABOUT ME

Detail-oriented Information Systems graduate and aspiring Data Analyst with a background in software testing and data validation. Skilled in SQL and Microsoft Excel (Power Query, Pivot Tables, XLOOKUP, and data visualization) for preparing, checking, and analyzing data. Familiar with identifying discrepancies, validating data accuracy and completeness, and producing structured reports. Committed to handling sensitive information responsibly and supporting reliable, data-driven HR operations.

CERTIFICATION

Associate Data Analyst - Badan Nasional Sertifikasi Profesi (BNSP)
January 2025

- Demonstrated competency in data collection, data preparation, validation, and basic data analysis in accordance with national data analytics standards.
- Applied standard data quality checks to ensure data accuracy, consistency, and completeness.
- Produced structured analytical outputs to support reporting and basic decision-making.

Associate Data Scientist - Vocational School Graduate Academy (VSGA)
August 2025

- Applied data preprocessing, exploratory data analysis, and basic data mining techniques using RapidMiner.
- Analyzed structured datasets to identify patterns and trends supporting analytical insights.
- Implemented data preparation workflows with a focus on data quality and interpretability.

PROJECT EXPERIENCE

Sales, Purchasing & Inventory Information System — Thesis Project
Laravel, MySQL | 2026 – Present

- Analyzed actual inventory and sales data provided by the business to understand stock movements, sales patterns, and inventory management requirements.
- Developed an inventory-based system integrating sales and purchasing transactions with automatic stock updates and stock monitoring.
- Structured and validated product, transaction, and inventory data to support stock accuracy, reporting, and inventory planning.

TECHNICAL SKILLS

- Data Analytics & Validation: Data cleaning, data profiling, data validation, trend and anomaly analysis, discrepancy identification
- SQL & Databases: SQL, MySQL, PostgreSQL, Oracle, relational database concepts, and data querying
- Spreadsheets & Analytics Tools: Microsoft Excel (Power Query, Pivot Tables, XLOOKUP, data visualization)
- Quality Assurance & Documentation: Data completeness and consistency checks, test case execution, defect identification, data definitions, and reporting documentation

RELEVANT COURSEWORK

2022 - 2026

Universitas Komputer Indonesia
Information Systems, GPA : 3.76

- Data Mining — Applied data preprocessing, exploratory analysis, pattern identification, and basic data mining using RapidMiner.
- Probability and Statistics — Applied descriptive statistics and probability concepts to interpret data and identify patterns.
- Database Systems and Database Design — Applied SQL, relational database concepts, normalization, and structured data management.
- Software Testing and Implementation — Applied software testing concepts, test case execution, defect identification, and system validation.
- Information Systems Risk Management and Audit — Studied internal controls, risk management, audit concepts, and data reliability.

SOFT SKILLS

Detail-Oriented | Logical Thinking | Teamwork | Communication | Time Management | Fast Learner
